

BTEC MUSIC SUMMER WORK

As we have already discussed, we are working on video evidence for Unit 6 over the summer period. This should be the start of a new piece that will eventually become a series for a short recital. Your videos should represent a true rehearsal where you discuss the positive parts of each section as you progress and how you intend to improve for your next recorded session.

Your performance will have a theme, which you will present as part of your recital. It's extremely important that you present in a professional way that is suited to your style/genre.

We will have further discussions and continue working on this as part of our lessons this week.
